Trainer and Learner Actions

Phase	Trainer Action	Learner Action	Resources
Explain	Connect AWS services to the exam domain and demonstrate the target workflow.	Annotate the guide and identify the expected outcome.	PPT, AWS documentation
Practise	Facilitate each numbered step and monitor cost/security guardrails.	Complete every lab step in order and retain evidence.	LG, AWS account, SageMaker AI
Validate	Check expected results, troubleshoot and debrief design choices.	Run validation checks, capture evidence and clean up paid resources.	Lab validation and cleanup sections
